

Anemo - Pray City Canyons Records

Brighton based CRS veterans Anemo returned with a new single Pray in October. The song itself is a thundering rock track with a great bass line and crunching guitars. It is far heavier than anything on their debut album Slowburn, and signals a marked change in direction for their second album which is due to follow shortly. Sisters Hazelle and Erika Woodhurst both have great voices which come over well live. Despite cramped stages and odd shaped venues they impressed the audiences with a run through of new and older material, and the power of their performances engaged even the casual observers.
